## GSM Community Telephone

The **Adondo** is a ready-to-go business in a box.

By providing a connection point for a standard telephone, fax machine and PC, the **Adondo** is a business tool used for over the counter re-selling of telephone calls, faxes and data services (for e-mail and web browsing). Because the **Adondo** uses the GSM network, standard fixed wire infrastructure is not needed and your business can be moved to take advantage of different opportunities.

The **Adondo** has many features that allow you to manage your business. You can, for example, control your profit margin, select a payment method for your customers, lock your unit to prevent unauthorised use and obtain over the air reports on usage and profit made.

All you need for a successful business, is in the box. Simply connect your unit and start making money.

## GSM Community Telephone

### Technical Data :

Power consumption at 12 V dc	Standby current	200mA
	Active call	350mA
	Peak burst	600mA
Operating voltage	10,5 V dc to 14,5 V dc	
Operating temperature	-10°C to +55°C	
Dimensions: Operator unit	65mm (H) x 150mm (W) x 240mm (L)	
Dimensions: Remote display	55mm (H) x 95 (W) x 130mm (L)	

### External Interfaces :

Analogue telephone via RJ 11 socket  
Group 3 class 1 and 2 fax machine via RJ 11 socket (optional)  
RS 232 connection via DB9 female connector

### Menu Settings :

Lock code  
Receive volume  
Display illumination (Operator unit)  
Account totals  
User defined (optional)

### GSM Interface :

GSM Output 900 MHz	Class 4, 2W EGSM
GSM Output 1800 MHz	Class 1, 1W DCS
SIM interface	3V mini SIM
GSM Data rate	Transparent and non transparent to 14400bps

### Remote Management :

Table of dialing codes  
Table of call charges  
Authorised maintenance centre numbers  
SMS settings  
Interrogation of network environment  
Update of operating firmware
